

Message from President of Parti Lepep on Independence Day

On the occasion of our Independence Day, I would like on behalf of Parti Lepep to extend my congratulations and greetings to all the people of Seychelles and to the members and supporters of our Party.

Today, we are celebrating 41 years of independence together as one nation. 41 years of achievements and dedication to the people of Seychelles. 41 years of unprecedented socio-economic progress and change.

Today, we stand as an equal to other nations in the world. A proud and dignified nation that is forever punching above its weight and which continues to score for all its people. Together, we continue to forge ahead despite our many challenges, to do better, to be better and secure what is best for our country and compatriots.

But today, we also remember and honour our leaders in SPUP, SPPF and Parti Lepep. They had the vision and foresight for a greater Seychelles. A Seychelles that can stand on its own, in liberty and equality. These leaders will never be forgotten because history cannot be rewritten. Today we acknowledge their contribution and courageous struggle for freedom, unity and social justice.

As we celebrate this milestone, it is incumbent on us to renew this spirit of fearlessness, to recommit ourselves to this struggle not against one another, but together as a Party, as one Seychellois People, unified under God, to create an even better Seychelles. This struggle continues, in a new political, economic and social environment. But we must always put our people, our children and our country first. Let us all join in and do it for our beloved Seychelles.

Happy Independence Day.
